

PERBICUBS FOUNDATION WEBSITE

DEVELOPMENT PROPOSAL

1. Executive Summary

This proposal outlines the design, development, and delivery of the PerbiCubs Foundation's official website — a fully custom, production-grade digital platform built to communicate the Foundation's mission, attract donors, and convert visitors into partners and advocates.

The site is not a template. Every page, interaction, and section has been designed from the ground up with one goal: to tell the complete story of PerbiCubs Foundation with clarity, emotional depth, and a clear call to action.

The platform includes a full Content Management System (Admin Panel) enabling the Foundation's team to manage all dynamic content in real time — with no technical knowledge required.

2. Project Overview & Objectives

Four Strategic Goals

- **Inform** — Educate the public, institutions, and media about the scope of learning poverty and the Foundation's evidence-based response.
- **Inspire** — Move visitors emotionally through photography, data storytelling, and human-centered narrative design.
- **Convert** — Turn informed visitors into donors, child sponsors, corporate partners, and advocates via calls to action across every page.
- **Manage** — Give the Foundation's non-technical team full control to update all content in real time without writing code.

Scope of Work

- 9 public-facing pages + 1 secured Admin Portal (6 management modules)
- Stripe & Pystack payment gateway integration
- Contact form, newsletter subscription, full SEO optimisation
- Supabase cloud database with image storage
- Complete codebase handover and deployment to preferred hosting

3. Design Philosophy

Holistic Storytelling

The site is designed as a single, unbroken narrative — not a collection of disconnected pages. Every visitor, regardless of their entry point, is placed in the middle of a purposeful three-act story:

- **The Problem:** Data, imagery, and statistics communicate the urgency of learning poverty in Sub-Saharan Africa.
- **The Solution:** The Foundation is presented as credible, tested, and UNESCO-recognized — with a proven model and measurable results.
- **The Call to Action:** Visitors are given clear, accessible paths to act — sponsor a child, partner, volunteer, or donate.

Visual Aesthetic

The design is modern, sophisticated, and mission-driven — deliberately avoiding the look of a generic charity website. Key features include full-screen hero photography with cinematic overlays, parallax scroll effects, animated section reveals, animated impact statistics, bento-grid gallery with lightbox, and floating editorial stat cards on program pages.

4. Typography & Color System

Typefaces

Quicksand (Primary) — All headings, body text, navigation, and UI elements. Round, geometric sans-serif that balances warmth with professionalism.

Playfair Display (Accent) — Pull quotes, highlighted statistics, and editorial headline variations. High-contrast serif communicating intellectual authority.

Brand Color Palette

Role	Color	Hex	Purpose
Primary	Teal Blue	#00ABBE	Buttons, links, active states, icons
Accent	Coral Salmon	#FF6B56	Section tags, CTA highlights, urgency indicators
Base Dark	Deep Navy	#0a1628	Backgrounds, footer, dark sections
Surface	Off-white	#f8fdfe	Page backgrounds, light fills

5. Website Architecture

Page	Purpose
Home	Primary narrative and conversion hub
About Us	Foundation story, team, mission, vision
The Problem	Learning poverty data and consequence chain
Our Solution	Four-pillar model and credibility evidence
Programs	Three program pillars and flagship scholarship
Get Involved	Sponsorship, partnership, and volunteering

Donate / Sponsor	Full donation flow — Stripe & Paystack
Gallery	Bento-grid photo gallery with lightbox
Blog	Stories, research, and Foundation news
Admin Portal	Staff-only content management system

6. Key Page Highlights

Admin Panel

A fully secured, purpose-built CMS requiring no technical knowledge. Protected by JWT authentication enforced at the infrastructure level. Five management modules:

- **Hero Slides** — Add, edit, reorder, and delete homepage carousel slides
- **Impact Numbers** — Update live statistics shown across the site
- **Photo Gallery** — Upload, caption, and categorize gallery photos
- **Blog Posts** — Create and manage all "Stories of Change" articles
- **Team Members** — Add and update staff profiles on About and Solution pages

7. Technology Stack

Layer	Technology	Reason
Frontend	Next.js 16 + TypeScript	SSR, SEO, server components, image optimization
Styling	TailwindCSS 4	Consistent design system, minimal CSS bundle

Database	Supabase (PostgreSQL)	Managed cloud DB, CDN image storage, 99.9% SLA
Animations	Framer Motion + GSAP + Swiper	Scroll reveals, carousels, counter animations
Payments	Stripe + Pystack	USD (international) + GHS Mobile Money (West Africa)
Auth	JWT via jose	Secure admin session management

8. Delivery, Hosting & Maintenance

Codebase Handover

The Foundation receives full, unrestricted ownership of all source code via a private GitHub repository. Included: all application files, configuration, a comprehensive README, and Supabase SQL migration scripts.

Hosting

Optimized for Vercel — zero-config deployment, global CDN, automatic SSL, and preview deployments. Compatible alternatives: Netlify, Railway, AWS Amplify, DigitalOcean, or any Node.js VPS.

Three-Month Free Maintenance

Complimentary post-launch support covering: bug fixes, security patches, hosting monitoring, and up to 2 minor content adjustments per month.

9. Deliverables Summary

#	Deliverable	Detail
1	Complete website source code	9 public pages + secured Admin Portal
2	Private GitHub repository	Full ownership transferred to the Foundation
3	Supabase database + storage	Schema, RLS policies, migration scripts
4	Stripe + Paystack integration	USD & GHS donation flows
5	Contact form + Newsletter	Email delivery + subscriber collection
6	Domain & hosting setup	Deployment + DNS configuration guidance
7	Admin Panel training	Walkthrough session for Foundation team
8	Technical documentation	README, env variable docs, developer handover
9	3-month free maintenance	Bug fixes, security patches, minor adjustments
10	Full SEO configuration	Meta tags, Open Graph, structured data for all pages
